Destroy in User-disk-service subproc:

1. Find LFH - if file not locally open then error:

2. Lock FHR if global open ct ≠ 1
   then UNLOCK & error

3. Scan ABR chain. If block in map
   then UNLOCK & error

4. Set global open ct = 0 in FHR

5. Release ABR chain and LFH

6. Refund space in DAR (MYDAR)
   fixed & swapped KCS

7. Leave file locked and send FHR
   addr + code (2) to CLOSER
